

SEED LIFESPAN IN YEARS

This chart has been combined with several other charts and I feel it might be more accurate. The best way to determine seed viability is to test the seeds once they get 'old'.

Arugula — 6

Asian Greens — 3

Bean — 3-4

Beet — 3-5

Broccoli — 3-5

Brussels Sprouts — 3-5

Cabbage — 3-5

Carrot — 3-4

Celeriac — 3

Cauliflower -4

Celery — 3

Chard, Swiss — 4-7

Chinese Cabbage — 3-5

Collards — 5

Corn, Sweet – 2-3

Cucumber – 3-6

Eggplant – 4-5

Endive – 5

Fennel – 3-4

Kale – 4-5

Kohlrabi – 3-5

Leek – 2-3

Lettuce – 6

Melon – 3-6

Mustard – 4

Okra – 2-3

Onion – 1-2

Parsnip – 1-3

Pea – 2-4

Pepper – 2-5

Pumpkin – 4-6

Radish – 4-5

Rutabaga – 4

Spinach – 1-5

Squash – 3-6

Tomato – 3-7

Turnip – 4-5

Watermelon – 4-5
